**NOTE**: You must reset DG-WR3001NE to factory default settings first (press reset button for 10 seconds), only incase if you have done some settings before.
Step by Step guide to connect and configure AP/Repeater using Windows System.

Connect to AP/Extender using Wireless:

Please make sure your computer has configure wireless adapter. Then please follow the below steps to connect to the AP/Repeater, wirelessly.

![Image of Connect/Disconnect window]

2. Select the SSID or Wireless name "DIGISOL" then click Connect.

![Image of SSID selection window]
Extender mode : Configuration

**Method-1** : Just Press the WPS button on the Main router or Root AP and immediately press the WPS button on the DIGISOL extender (DG-WR3001NE) for 2 to 3 seconds, then a wireless connection will be established automatically between both Main Router and Extender.

![WPS Connection Diagram]

**Note** : The WPS connection will be invalid if it is already connected to any other router successfully, then you must reset it to the factory default setting first, then start the WPS connection again.

**Method-2** : Type website address, http://192.168.2.1 in Internet explorer or Browser address column, then input the username as "admin" and Password as "1234" to login, you can see the Home Page as shown below. If you select "Clone Router" then Extender’s SSID and password will be same as Main router / Root AP (recommended).
Input the password of Main Router / Root AP and click "Finish".

**AP Mode : Wireless Access Point configuration**

1. Input the website [http://192.168.2.1](http://192.168.2.1) in Internet explorer address column, then input the username “admin” and password with “1234”. when enter the main page select the “AP” and click “Save Setting”

(You can type Password (minimum 8 characters) to secure the wireless network, which is Optional)

**Note**: If you want to setup the Extender Mode again, then you must reset it to factory default setting by pressing reset button upto 10 seconds).
