Introduction:-

DIGISOL DG-GS1028PF-B Switch offers 24x10/100/1000Mbps Ethernet ports with Power over Ethernet support with 2*1000Mbps Base-T and 2*1000Mbps SFP uplink ports. These PoE ports are IEEE 802.3af and IEEE802.3at compliant and can supply up to a Max. of 30 watt per port and a total PoE power of 300Watt. The existing Ethernet cables can be used to power up PoE compliant network devices connected to the PoE switch. This eliminates the need of an external power source and power cabling for such devices. The switch provides flexibility to users for connecting a PoE or non PoE device. The PoE devices connected to switch can be easily identified by the separate PoE LED status indicators for each port.
